INDEX

120, 121

Foreword

Minnesota's farm and food sector has always been a powerful engine driving our state economy, but as we move deeper into the 21st century, there are even more reasons to be excited about our agricultural economy.

Today, Minnesota's agriculture sector provides more than 340,000 jobs for the state and creates \$75 billion in economic activity. In addition to our 81,000 farms, Minnesota has nearly 1,000 agricultural and food companies. Seven of Minnesota's top 20 public companies have roots in the farm and food sector, and Minnesota has several privately held firms with an agricultural focus on Forbes' List of America's Largest Private Companies. As we look toward a future in which the world's food needs are expected to double by 2050, it becomes clear that our farm and food sector will only become more important and more prominent in the years to come.

The Minnesota Department of Agriculture's mission is to enhance Minnesotans' quality of life by ensuring the integrity of our food supply, the health of our environment, and the strength of our agricultural economy. As part of that mission, the department helps produce the annual Minnesota Agricultural Statistics book. This book provides a range of high-quality information on trends in crop and livestock production, farm income and other data. This accurate information is vital for decision-makers across the agricultural sector.

I want to take this opportunity to thank the Minnesota farmers and agri-businesses who respond to the surveys by the Agricultural Statistics Service. This valuable book is possible only through their ongoing cooperation and support.

Dave Frederickson, Commissioner
Minnesota Department of Agriculture

The 2012 Minnesota Agricultural Statistics bulletin presents the statistics for 2011 and 2012 from the United States Department of Agriculture's National Agricultural Statistics Service in cooperation with the Minnesota Department of Agriculture. This publication documents Minnesota's farmers' efforts in feeding the nation and the world. Production from our farmers has Minnesota ranked in the top ten leading states for several commodities. Agriculture plays a key role in the Minnesota economy and helps make Minnesota a great place to live and grow.

These statistics provide a voice for farmers and also provide facts to build for the future of agriculture. This is also true for the 2012 Census of Agriculture providing the voice and the future for farmers and agriculture. I say "Thank you" to the farmers and agribusiness people and County FAC members who participate in USDA NASS surveys. Your participation allows your voice to be heard and your future to be shaped on facts for all agriculture. As always, USDA NASS counts agriculture because "Agriculture Counts"!

If you would like additional information, e-mail us at nass-mn@nass.usda.gov or call us at 1-800-453-7502. You can also access our reports at www.nass.usda.gov/mn.

Douglas Hartwig, Director
Minnesota Agricultural Statistics

FARM NUMBERS

The 2011 total number of farms in Minnesota was estimated at 79,800, 700 less than 2010. The number of farms in the \$1,000-\$9,999 economic sales class was 35,500, 1,000 less than 2010. The number of farms with sales in the \$10,000-\$99,999 economic sales class was 21,300, 200 less than 2010.

Farms in the \$100,000-\$249,999 economic sales class were 8,900, 300 less than 2010. Farms in the \$250,000-\$499,999 economic class were 7,000, 400 more than 2010. Farms in the \$500,000 and over sales class were 7,100, 400 more than 2010.

A farm is defined as any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during the year.

Government payments are included as sales.

NUMBER OF FARMS, LAND IN FARMS, AND AVERAGE SIZE: Minnesota, 2000-2011 1/

2011 Weather Summary

January 2011 began with a blizzard over western Minnesota and marked the continuation of the snowy and cool winter of 2010-11. The coldest temperatures of the season, and of 2011, were on January 21 when both International Falls and Babbitt bottomed out at -46 degrees F. The deepest snow cover of the season was in mid-February where parts of southwest Minnesota and along the north shore were seeing depths up to three feet. River levels reached major flood stage in the spring along the Mississippi, Minnesota, St. Croix, and the Red River.

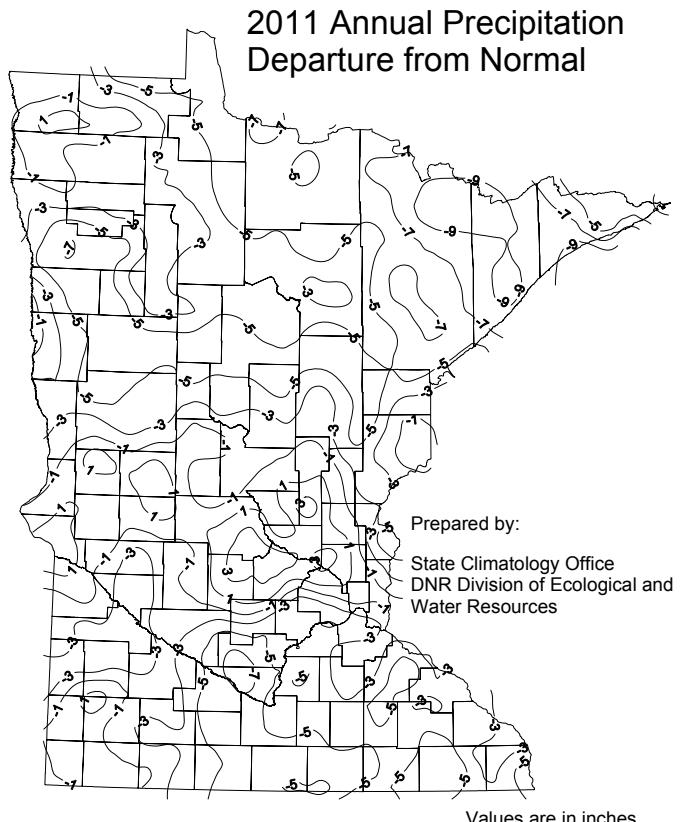

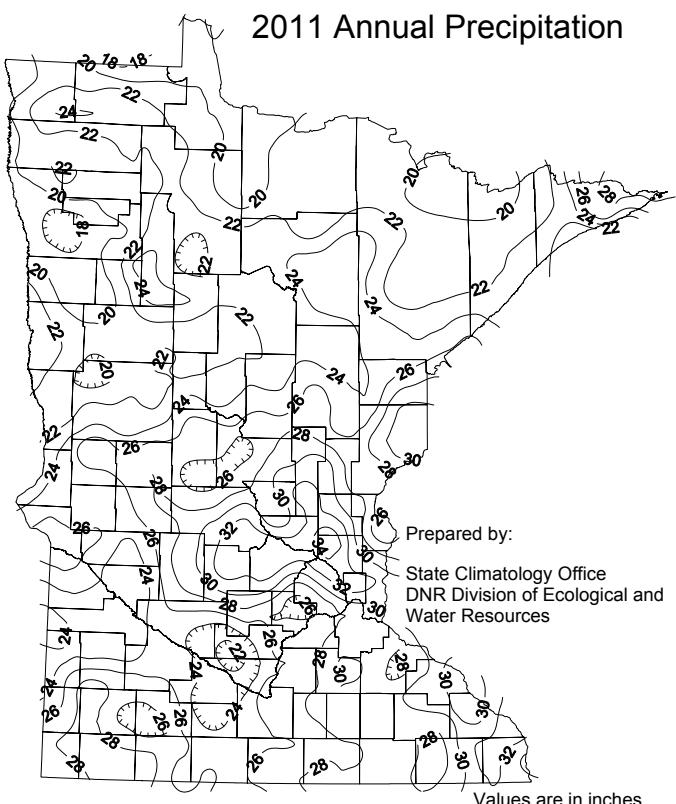

Two thousand eleven had its share of summer heat. Many areas in central and southern Minnesota hit 100 degrees this past summer. However, the biggest heat related news story of the summer was the oppressive dew point temperatures in mid July. On July 19th a record 88 degree dew point temperature was reported at Moorhead. This broke the old record of 86 degrees that was set on July 23, 2005. July was also quite stormy, with one of the most widespread rain and severe events occurring on July 1. A large cluster of thunderstorms produced wind damage from South Dakota across Minnesota and into northwest Wisconsin. Six tornadoes touched down with this event. Many in Minnesota awoke to frosty lawns on the morning of September 15 as the first frost arrived a week or two earlier than the median dates over much of central and southern Minnesota.

The developing drought took center stage during the fall. The drought began in late July and intensified during September and October. From September 1 to November 30, many places in southern Minnesota were from five to six inches short of normal. Some places in central and southern Minnesota saw their driest autumn in history since modern weather record keeping began in the 19th century. The dryness, along with above normal temperatures, parched the landscape. On September 29th numerous field fires fanned by strong winds were reported in southern Minnesota. Available soil moisture in November at Waseca was at the lowest in over a decade compared to the same dates in previous years.

The meteorological autumn from September 1 to November 30 was two to five degrees above normal in the state. The warmest part of the fall was the first week of October with many places in Minnesota seeing high temperatures in the 80's. For the start of the winter of 2011-12, snowstorms were few and far between in the state. The drought continued to persist through the winter months. Average temperatures for November and December finished much above normal and it looked like there would not be a repeat of the cold and snowy winter of 2010-11.

The maps below depict the total precipitation for 2011 and the departure from the 1980-2010 normal. Many places in Minnesota fell short of normal, with some areas in south central parts of the state from five to seven inches below normal. The Arrowhead was even drier with spots of up to nine inches or more below the annual average.

1/ First Cutting.

MAJOR CROP DEVELOPMENT CALENDAR, MINNESOTA, 2011

2011 CROP SUMMARY

January temperatures were generally colder than the historical average statewide. Several winter storms brought snowfall across the state, with varying amounts relative to normal. Some areas received above normal amounts, including Rothsay and Fairmont with over 19 inches, Babbitt with over 20 inches, and Red Lake Falls with 25 inches.

Average temperatures in **February** were near normal despite some very chilly readings during the first half of the month. Many areas received above average snowfall in February. The deepest snow cover of the season was in mid February, where parts of southern Minnesota and along the north shore were seeing depths up to three feet.

March warmed slightly, and many observers saw their first temperature readings of 50 degrees or higher since November of the previous year. Statewide precipitation varied, but heavy winter snowfall led to spring flooding concerns. Wet conditions kept producers from beginning early fieldwork activities.

Spring flooding was underway in Minnesota rivers and tributaries in **April**, due to high moisture in the soil after back-to-back wet years and the near record winter snowfall. The wet conditions delayed spring fieldwork placing it behind the five-year average pace. There was minimal progress on small grain planting by the end of the month and land preparation for corn and soybeans was just underway, well behind the average pace. Topsoil moisture supplies were rated adequate to surplus across the state.

Early in **May** producers received a short break in the wet weather pattern and made planting progress despite variable conditions. Cool weather and frequent rain prevented many fields from drying out, yet producers took advantage of any dry days for planting activity. Small grain planting was nearly complete by the end of May, while corn and soybeans remained behind the average pace. Corn was 88 percent planted and soybeans were 53 percent planted as of May 29. Progress was made on other crops, with sugarbeets and potatoes over 90 percent planted by month's end. Planting progress of canola, green peas, sweet corn, dry beans, and sunflowers trailed behind their averages. Initial condition ratings of small grains and corn were mostly fair to good.

June began with warmer and drier conditions and by the week ending June 12, only sweet corn, sunflowers, and dry beans had not reached 90 percent planted. By the end of the month wet conditions had caused delays cutting and harvesting the first crop of alfalfa. Small grains were primarily in the jointing stage and were heading by the end of the month. Corn and soybeans were emerged, and as of June 26 the average corn height was 16 inches and the average soybean height was 5 inches. Corn and soybean conditions were rated primarily fair to good during the month and pasture conditions were rated mostly good to excellent. Topsoil moisture supplies were rated mostly adequate to surplus during the month.

The beginning of **July** brought hot and dry conditions to the state, which helped to reduce surplus topsoil moisture supplies and promoted crop development, although some areas stayed wet. Thunderstorms towards the end of the month ended the longest stretch of dry weather the season had seen so far. The small grain crop was turning ripe behind average pace and harvest was just beginning for oats and

barley. Other harvest activities included canola, potatoes and sweet corn. Corn, in the milk stage, and soybean development, in the blooming and setting pods stage, both progressed behind average pace. By the end of July, corn and soybeans were rated primarily in good condition. Topsoil moisture was rated 76 percent adequate as of July 31.

The small grain harvest progressed in **August** catching up with the average pace. By the end of the month, all three small grains had exceeded 75 percent harvested, with oats beyond 90 percent harvested. The potato and canola harvest remained behind the average pace, while the sweet corn harvest edged ahead of average. Corn progressed from the dough stage into the dent stage, and development was closer to average pace by the end of the month. Soybeans continued in the setting pods stage, and by the end of the month the first of the soybeans were in the turning yellow stage. Corn and soybean condition ratings remained primarily good. Corn condition was rated 51 percent good, and soybean condition was rated 50 percent good at the end of August.

Topsoil moisture supplies continued a steady decline in **September** as conditions were mostly dry throughout the month. The dry conditions aided the small grain harvest and by mid month the harvest for all three small grains was nearly complete. Corn entered the mature phase and harvest was underway. Soybean development was behind average during the month, but harvest advanced quickly. The canola harvest was complete by mid month, while the sweet corn harvest was complete by the end of the month. The dry bean, potato, and sugarbeet harvest progressed at a below average pace. Dry beans and potatoes were over 50 percent harvested by the end of the month, while the sugarbeet harvest had just begun.

Rapid harvest progress was made in **October**, and corn and soybean development advanced ahead of average pace, for nearly the first time during the 2011 growing season. By the end of the month, the soybean harvest was complete, and the corn harvest was over 90 percent complete, ahead of the average pace. The average moisture content of corn and soybeans was below the five-year average. Harvest was completed for sugarbeets and potatoes by the end of the month.

The corn and sunflower harvest wrapped up by early **November** during dry conditions that allowed producers to complete fall fieldwork. Minimal precipitation fell during the month, and areas of northern, as well as most of southern Minnesota were classified as undergoing moderate to severe drought by the U.S. Drought Monitor.

December was warm and dry, placing 2011 among the top ten warmest Decembers statewide, and one of the ten driest historically, as well. December temperatures continued a significant warming trend that began in October, which marked one of the warmest October, November, and December periods in state history. As of December 29, snow cover was negligible across the state. The exception was the Northwest District which reported between 1 and 8 inches of snow.

1/ Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketing. Marketing year periods, by crop, are June-May for hay, July-June for barley, canola, flaxseed, oats, potato and wheat, September-August for soybean, sunflower and dry beans, October-September for corn. Prices and value of production for dry beans not available by class. Prices do not include allowance for CCC loans outstanding, purchases by the government, or deficiency payments. Price for latest year shown is preliminary. It includes an allowance for marketings from December through the remainder of the marketing year.

2/ Acreage planted to corn is for "all purposes".

3/ The sugarbeet price relates to prices received by producers during the harvest period.

4/ Excludes Sugar Act payments.

5/ Estimates not available at the time of this publication.

6/ All Forage production is the sum of the following dry equivalents: alfalfa hay harvested as dry hay, all other hay harvested as dry hay, alfalfa haylage and greenchop, all other haylage and greenchop after converting alfalfa and all other haylage and greenchop to a dry equivalent basis.

7/ All alfalfa forage production is the sum of alfalfa harvested as dry hay and alfalfa haylage and greenchop production after converting it to a dry equivalent basis.

8/ Includes all types of forage harvested as haylage or greenchop (green weight). Forage harvested as dry hay and corn and sorghum silage/greenchop are not included.

9/ Includes only alfalfa and alfalfa mixtures that were harvested as haylage or greenchop (green weight). Alfalfa harvested as dry hay is not included.

10/ Price per unit for sweet corn and green peas includes price received by the producer plus expenses incurred by the processor to get the commodity to the processing plant door.

(D) Withheld to avoid disclosing data for individual operations.

OBJECTIVE YIELD: Corn, Soybeans, and Potatoes, Minnesota, 2007-2011

The USDA, NASS, Minnesota Field Office conducts objective yield surveys for corn, soybeans, and potatoes. Randomly selected plots in fields across the state are visited monthly from August through harvest to obtain specific counts and measurements. Data in these tables are rounded actual counts from these surveys and are not official estimates of the Agricultural Statistics Board, but are intended to show trends in production practices.

CORN FOR GRAIN: Plant Population per Acre 1/

Month	2007	2008	2009	2010	2011
<u>Number of Plants</u>					
September	29,850	30,150	30,800	29,850	30,250

LIVESTOCK SUMMARY

The number of cattle on Minnesota farms on January 1, 2012, was down 20,000 from the January 1, 2011, inventory. Minnesota's 2011 calf crop, at 780,000, was down 2.5 percent from 2010. January 1, 2012, sheep and lambs inventory increased to 150,000, as of January 1, 2011. The inventory of all hogs on December 1, 2011, was up 1 percent from a year earlier. During 2011, 1,160,000 sows farrowed, 1 percent lower than the previous year. A pig crop of 11,957,000 pigs was produced in the state during 2011, up 6.6 percent from 2010. The average annual litter rate of 10.26 pigs per sow was up from 10.10 in 2010. The number of chickens on farms was down 3.4 percent from a year earlier.

The combined value of all livestock and chickens on Minnesota farms was \$3.78 billion at the end of 2011. The value of all cattle and calves, at \$2.62 billion, was up 13.5 percent from a year earlier. The value of hogs on hand on December 1, 2011, accounted for \$1.1 billion, up 9 percent. As of January 1, 2012, the value of all sheep and lambs, at \$34.1 million, was up 41.6 percent. The value of all chickens inventory was \$35.4 million, down 6.9 percent from last year.

DAIRY

Minnesota's milk production totaled 8.89 billion pounds in 2011, down 2.4 percent from 2010. The state's share of national production in 2011 was 4.7 percent. The 12-month average number of milk cows was 468,000 versus 470,000 in 2010. The average annual milk production per milk cow for 2011, at 18,996 pounds, was down from 19,366 pounds in 2010. The count of Minnesota dairy farms licensed to sell milk to plants in January 2012 totaled 4,221. This compares with the totals of 4,435 for January 2011 and 4,567 for January 2010.

DAIRY: Milk Production, Disposition, and Income, Minnesota, 2007-2011

Year	Total Milk Produced	Disposition of Milk Produced			Cash Receipts	Producer Gross Income 1/		
		Used on Farms Where Produced		Sold to Plants and Dealers				
		Fed to Calves	Consumed in Farm Household					
		<u>Million Pounds</u>			<u>1,000 Dollars</u>			
2007	8,656	105	5	8,546	1,692,108	1,693,098

1/ Includes sheep shorn at commercial feeding yards.

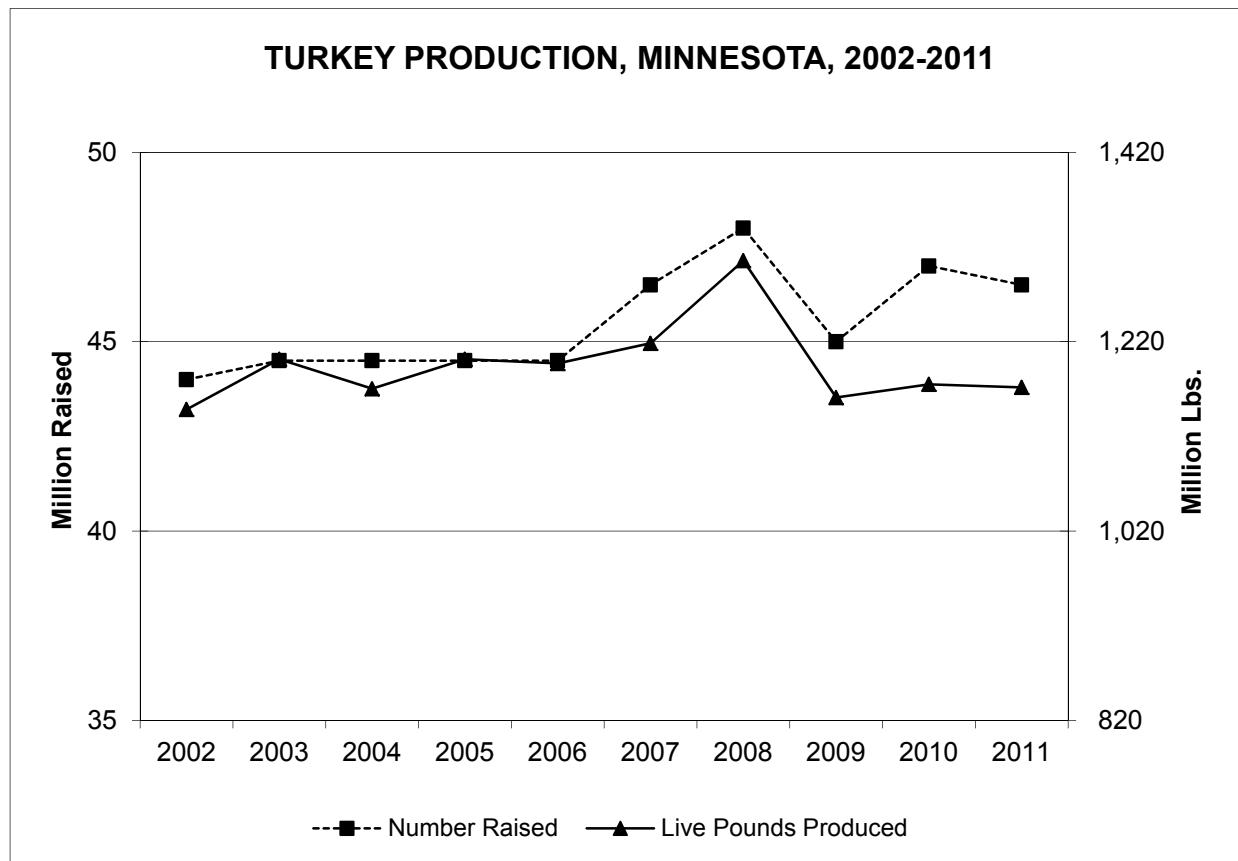

POULTRY SUMMARY

In 2011, Minnesota turkey growers ranked first in number of turkeys raised and in pounds produced. Minnesota growers raised 46.5 million turkeys, down 1 percent from 2010. The total liveweight of turkeys produced was 1.17 billion pounds, nearly equal to the previous year. The average price received for turkeys in 2011 was \$0.68 per pound, and the value of the state's turkey production in 2011 was \$799 million.

During 2011, hatcheries in the United States placed 278 million turkey poult, up 1 percent from 2010.

Minnesota's total chicken inventory (excluding broilers) on December 1, 2011, was 13.1 million birds, down 3 percent from the previous year. The state's egg production in 2011 was 2.82 billion eggs, down 2 percent from 2010. The value of eggs produced was up 11 percent in 2011, to \$187 million. The all-egg price increased to \$0.66 per dozen. The annual average number of layers on farms was down 1 percent, to 10.2 million.

In 2011, the number of broilers produced was 41.6 million, a 1 percent decrease from 2010. In 2011, the value of broiler production decreased to \$109 million, from \$111 million in 2010. These poultry estimates are based on survey data reported by producers, hatcheries, and processing plants.

EXPORTS

Minnesota ranked sixth in farm exports for fiscal year 2010. The value of the state's exports came to \$5.04 billion, versus \$4.14 billion in 2009. This accounts for 4.64 percent of the U.S. total.

The table below shows the value of farm exports by commodity group. These figures are not actual exports but are derived from Minnesota's contribution to U.S. production and/or sales. They reflect Minnesota's important stake in the national export market.

AGRICULTURAL EXPORTS: Minnesota, FY 2010 1/

Commodity	Value
	Million Dollars
Feed Grains & Products	1,132.9
Soybeans & Products	2,182.2
Wheat & Products	376.1
Live Animals & Meat 2/	542.0

LAND VALUES

Each year, the Minnesota Department of Revenue compiles farm sales in the state into a single data set that includes sale price, parcel size, number of tillable acres, and other pertinent items.

Statewide, the number of farm sales totaled 1,115 for January 1 through September 30, 2011. The average acreage per sale was 113 acres in 2011, compared with 117 acres in 2010. The average sale price per acre for the same period in 2011 was \$3,533, a decrease of \$30 per acre from the 2010 average.

Cropland rented for cash in the state averaged \$151.00 per acre in 2012, an increase of \$16.00 from a year ago.

FARM REAL ESTATE SALES: Number, Acres, and Price, Minnesota, 2007-2011

Year	Number of Sales	Acres Sold	Price Per Acre		
			Average 1/ 2/	Minimum 2/	Maximum 1/
2007	2,429	272,216	2,723	240	14,634
2008	2,577	307,462	3,284	268	14,679

NET FARM INCOME	5,758,220	3,121,108	4,638,647	5,784,631

1/ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

2/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

1/ USDA estimates and publishes individual cash receipt values only for major commodities and major producing States. The U.S. receipts for individual commodities, computed as the sum of the reported States, may underestimate the value of sales for some commodities, with the balance included in the appropriate category labeled "other" or "miscellaneous." The degree of underestimation in some of the minor commodities can be substantial.

2/ Beginning in 2011, sheep and lambs included in all other livestock.

Last updated: November 2011

*The estimate is statistically unreliable due to the combination of a low sample size and a high sampling error.

Crop Prices Received by Farmers

The USDA, NASS conducts the monthly Prices Received Survey to estimate the prices farmers and ranchers receive for crop and livestock commodities. USDA, other government agencies, Congress, economic researchers, farm organizations, agribusinesses and others use price data to monitor financial developments in the agriculture sector. The primary sources of the crops prices listed in the following tables are elevators and dealers, who buy directly from farmers.

The Marketing Year Average Price is the weighted average price received for a commodity over the course of the crop's marketing year. Preliminary MYAs are forecast, but are not included here. Crop Price tables are organized by each commodity's marketing year.

LIVESTOCK, DAIRY, AND POULTRY PRICES

The livestock, dairy, and poultry price statistics included in these tables are based on reports from farmers, auction markets, livestock buyers, meat and poultry processing plants, Market News Service, produce houses, egg handlers and dealers, marketing cooperatives, dairy plants, and other firms doing business with farmers. The marketing year for livestock, dairy, and poultry items is a calendar year, except for hogs, chickens, and eggs, which are on a December-November basis.

The 2010 Minnesota annual average prices for meat animals were higher in 2010 than in 2009. Beef cattle were up \$12.60 per hundredweight and steers and heifers were also up \$12.60. Cows increased \$10.10 and calves were up \$14.00. All hogs increased \$13.50 and barrows and gilts were up \$13.60, while sows were up \$12.40. Sheep were up \$18.30 and lambs were up \$31.10. All milk and grade A fluid milk were \$16.10, and manufacturing milk was \$14.30 per 100 pounds. Milk cows for dairy herd replacement decreased to \$1,270 per head.

1/ State estimates were discontinued in 2011.

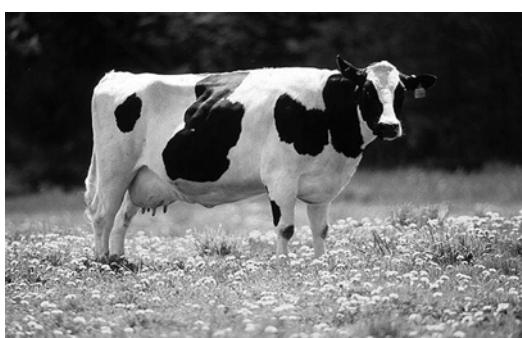

2/ Cows and Steers and Heifers combined.

3/ Beef cows and cull dairy cows sold for slaughter.

4/ Annual average price is the marketing year average-December previous year through November current year.

5/ "Barrows and Gilts" and "Sows" combined

6/ Cows sold for dairy herd replacement

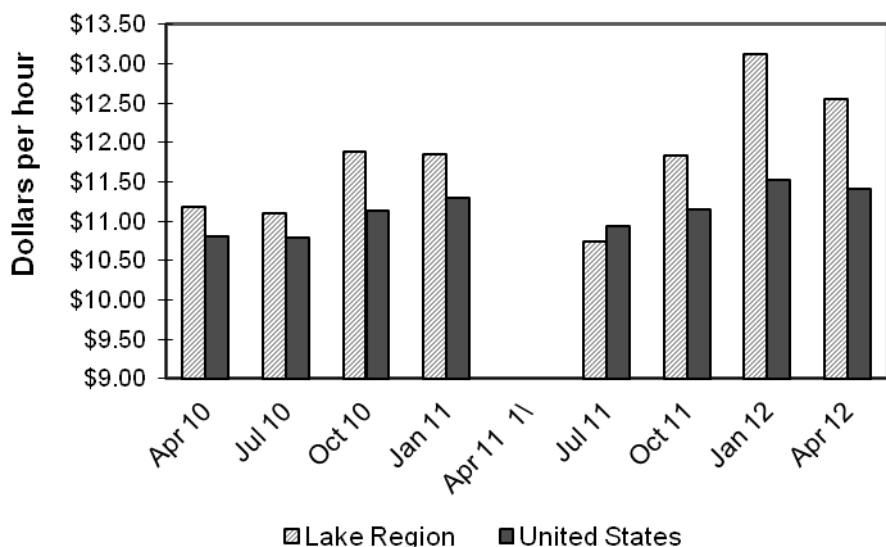

FARM LABOR

Beginning in 2012, two quarters of regional and national data for hired workers, hours worked, and wage rates are published semi-annually. Minnesota is included in the Lake Region, which also includes Michigan and Wisconsin. Information from the Farm Labor report is used to establish minimum wage rates for agricultural workers, administer farm labor recruitment and placement service programs, and assist legislators in determining labor policies.

Farm Labor estimates are made at the U.S. and regional levels for January, April, July, and October for the week including the 12th of the month.

WAGE RATES FOR ALL HIRED WORKERS Excluding Agricultural Service Workers

1/ Wage Rates were not published in April 2011 because the survey was not conducted due to budget constraints.

FARM LABOR: Farm Workers and Wages by Type of Work, Lake Region, 2010-2012 1/

Year and Month	Hired Workers and Hours Worked			Wages, Type of Work			
	Number of Workers	Expected to be Employed		Number of Hours Worked	All Hired	Field	Livestock
		150 Days or More	149 Days or Less				
2010		-----1,000 Workers-----		Hours	-----Dollars Per Hour-----		
January	46	41	5	33.8	11.22	11.12	9.97
April	62	47	15	37.4	11.18	10.95	10.18
July	64	42	22	34.4	11.10	11.09	9.47
October	67	46	21	37.5	11.88	11.58	10.06
Annual Average 2/				11.37	11.23	--	10.62
2011		-----1,000 Workers-----			-----Dollars Per Hour-----		
January	45	37	8	36.0	11.85	11.76	10.45
April 3/	--	--	--	--	--	--	--
July	74	50	24	36.7	10.75	10.33	10.24
October	77	46	31	40.8	11.83	11.59	10.71
Annual Average 2/				11.40	11.09	--	10.78
2012		-----1,000 Workers-----			-----Dollars Per Hour-----		
January	39	35	4	34.5	13.12	12.99	11.47
April	57	42	15	35.6	12.55	11.71	11.59
							11.66

1/ Farm Workers excludes Agricultural Service Workers. Lake Region includes Minnesota, Michigan, and Wisconsin.

2/ Annual rates are averages of the published wage rates for each survey week weighed by the number of hours worked during the week.

3/ Wage Rates were not published in April 2011 because the survey was not conducted due to budget constraints.

REPORTS AND DATA FROM THE USDA'S NATIONAL AGRICULTURAL STATISTICS SERVICE (NASS)

Internet:

Reports and data from USDA, NASS, as well as from the Minnesota Field Office, are available on the Internet. Information is also available on the Internet from the Minnesota Department of Agriculture (MDA).

For access, connect to the Internet and choose from the following:

USDA, NASS:

www.nass.usda.gov

Minnesota Federal Field Office:

www.nass.usda.gov/mn/

State of Minnesota Department of Agriculture:

www.mda.state.mn.us/

E-Mail Subscriptions:

NASS Reports: You can subscribe to NASS reports using a FREE e-mail service. From the NASS Homepage address shown above, select **Publications**. From the **Publications** page, under the **Receive NASS Updates** heading, click on either National or State selections to sign up. It is as simple as clicking on the report name.

Minnesota Field Office Reports: You can also subscribe to the Minnesota Field Office reports, or reports from other States, by using the FREE e-mail service. Again, from the NASS Homepage address shown above, select **Publications**. From the **Publications** page, select State under the Receive Reports by Email heading and then follow the instructions.

Internet Published Estimates Database:

Historical County, State, and U.S. information is available in an online database via the Internet FREE OF CHARGE. The database provides custom downloads based on commodity, year, State, and other selection criteria and produces an output file compatible for updating databases and spreadsheets. The data base can be accessed from the NASS Homepage at: <http://www.nass.usda.gov>. Under the heading Quick Stats, select More, select Go under Quick Stats 2.0, then select the items of interest to customize your search.

NASS Subject Specialists:

NASS maintains a listing of subject and commodity specialists for the various program areas. From the NASS Homepage, click on **Ask A Specialist**, then select the desired commodity item from the list.

NASS Customer Service

Agricultural Statistics Hotline:

NASS operates an information center, staffed 7:00 AM to 4:30 PM ET Monday-Friday, to assist you with accessing reports and data via the Internet, or printed copies. Please call **1-800-727-9540**.

Printed Report Subscriptions:

Subscriptions to receive printed NASS reports are available for a fee. To subscribe to national reports, call the National Technical Information Service (NTIS) toll-free **1-800-999-6779** and ask for a list of reports and prices. A catalog of report descriptions and ordering information can be found after accessing the NASS website and selecting Publications, Browsing the Catalog.

The **USDA, NASS, Minnesota Field Office** offers subscriptions to the following printed reports by calling **1-800-453-7502**:

Agri-View - A comprehensive farm newsletter covering planting reports, monthly and annual crop production, grain stocks, cattle, hogs, monthly milk output, farm income and expenses, current and outlook information, economic trends, etc.

Weekly Crop-Weather - Issued each Monday during the growing season, this report follows crop progress and condition, and provides weekly temperature and precipitation data.

Minnesota Agricultural Statistics Bulletin - Our annual bulletin, available each summer, containing State and county crop and livestock estimates, farm income data, land values, number of farms, prices, etc.
